

Introducing the ExtraLight roof tiling system, a new and unique high performance textured tile.

The ExtraLight shingle textured-finish tile captures the subtle look and charm of low-profile traditional shingles.

With an ExtraLight shingle roof, you can eliminate the delaminating, lifting and general break-down caused by strong UV rays and high winds associated with other shingle roofs.

With its exceptional durability, an ExtraLight shingle roof offers superior performance and all the advantages of stone-coated steel.

The ExtraLight shingle comes in a choice of natural weathered tones to recreate the visual appeal of a natural clay tiled roof.

The ExtraLight Roof Tiling System

UNIQUE HIGH PERFORMANCE TEXTURED TILES

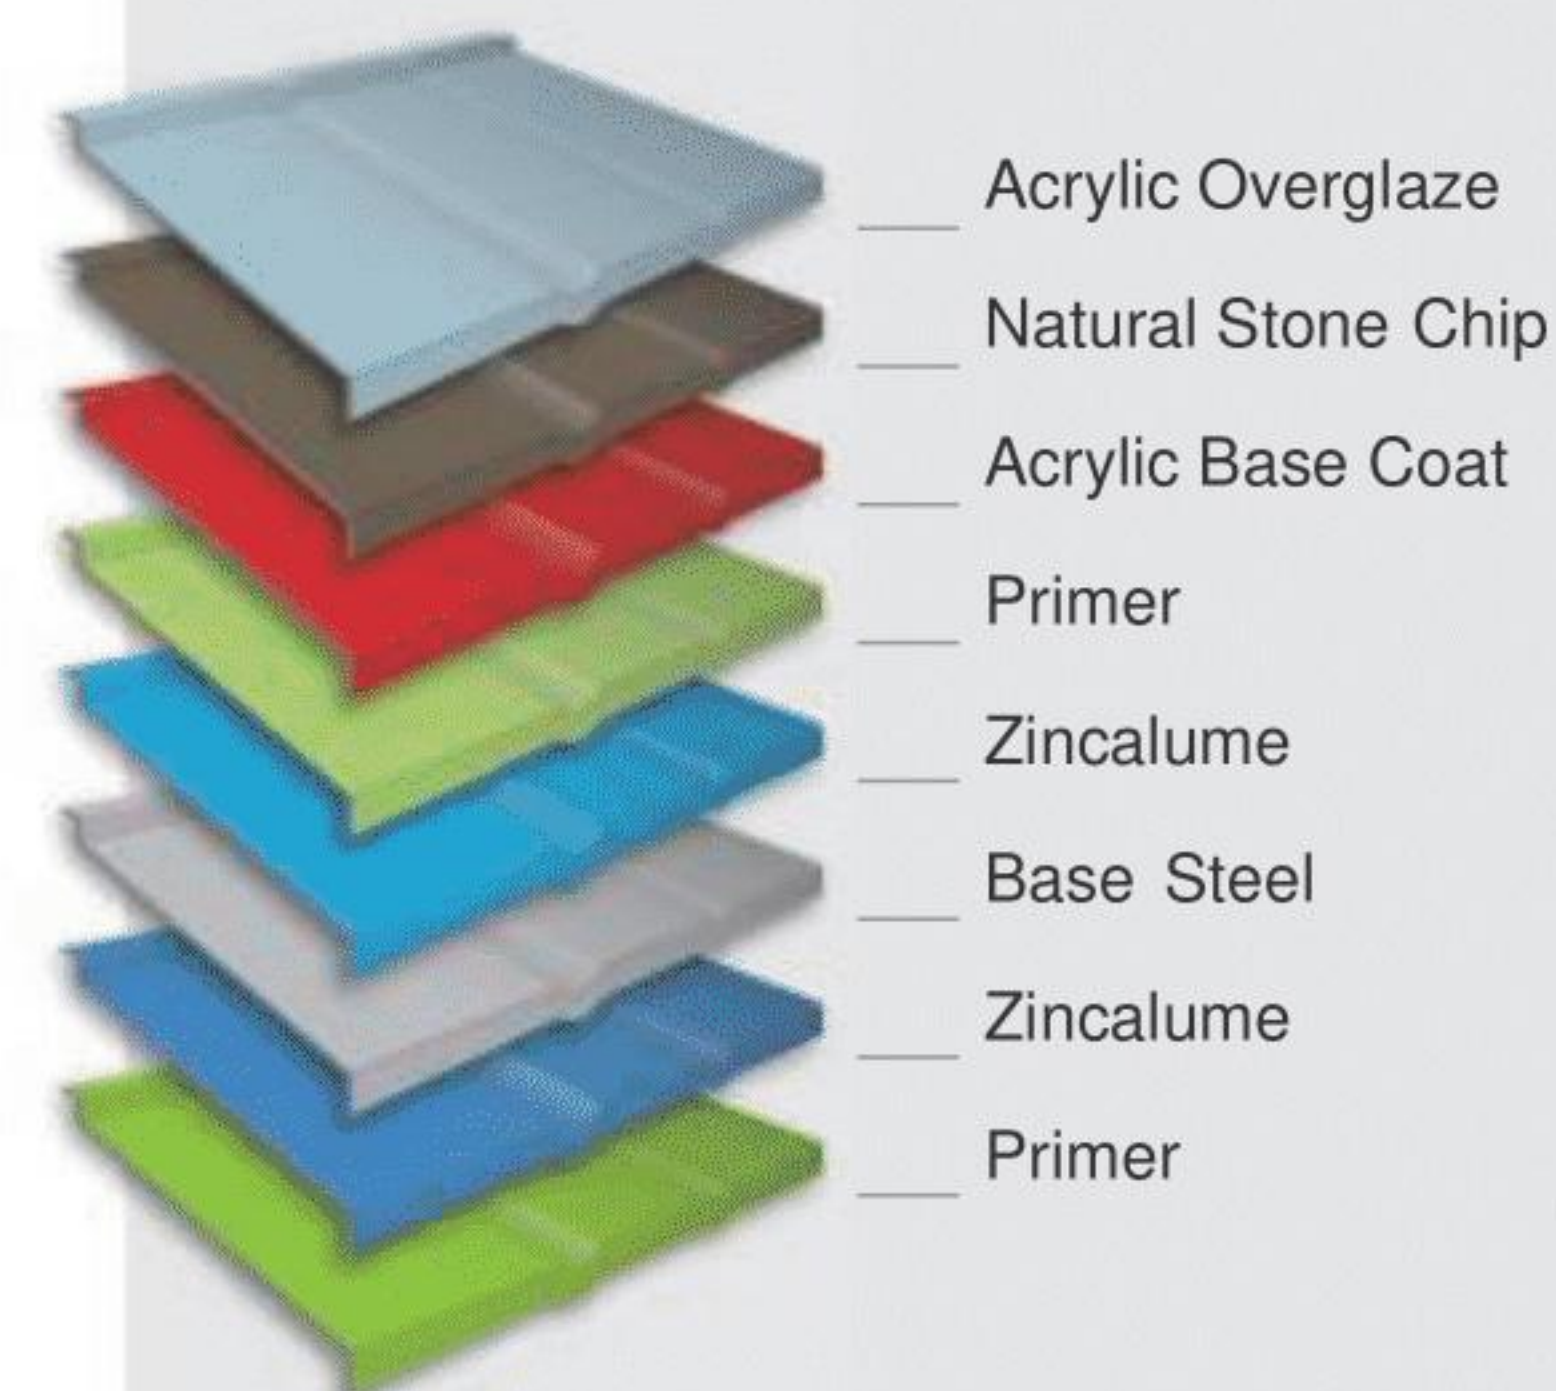

THE LOW-PROFILE APPEAL OF SHINGLE

Extensive research and development in the design process ensures every ExtraLight product is manufactured to the highest quality with exceptional durability and strength. The tile profiles and roofing accessories are engineered to interlock and overlap to resist wind lifting and keep out the harsh elements. At less than 7kg/m², our ExtraLight tile is suitable for lightweight roof construction, so considerable cost savings can be achieved during construction. The perfect replacement for your old existing roof, letting you improve the look and value of your home in a matter of days.

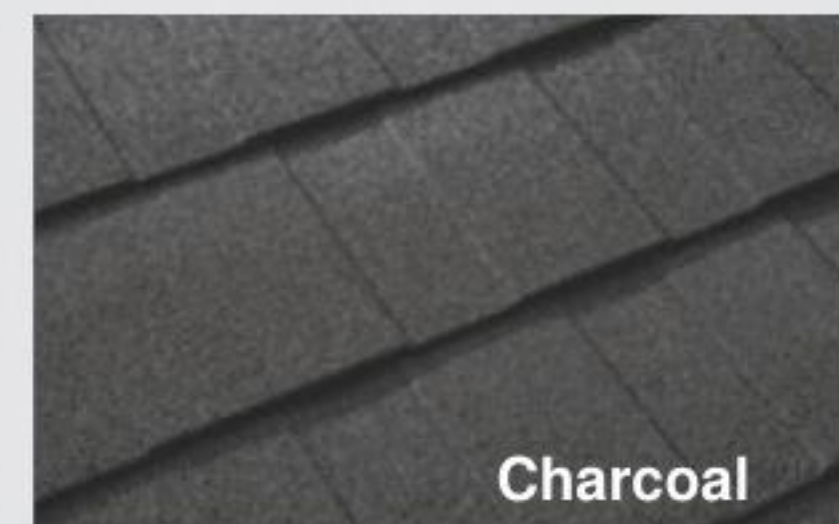

All ExtraLight roofing products are fabricated from Zinalume[®] protected steel. The ExtraLight textured finish provides added protection by embedding natural stone granules in an acrylic base-coat. A final clear acrylic over-glaze is applied before being oven cured. This extremely durable UV-resistant coating enables our roofing products to withstand the harshest conditions. Independent test reports, appraisals and field results confirm our products are 100% waterproof, fire resistant and able to withstand hurricane-force winds of up to 120mph. An ExtraLight roof will not only safeguard your investment but will also give you complete peace of mind.

DURABILITY

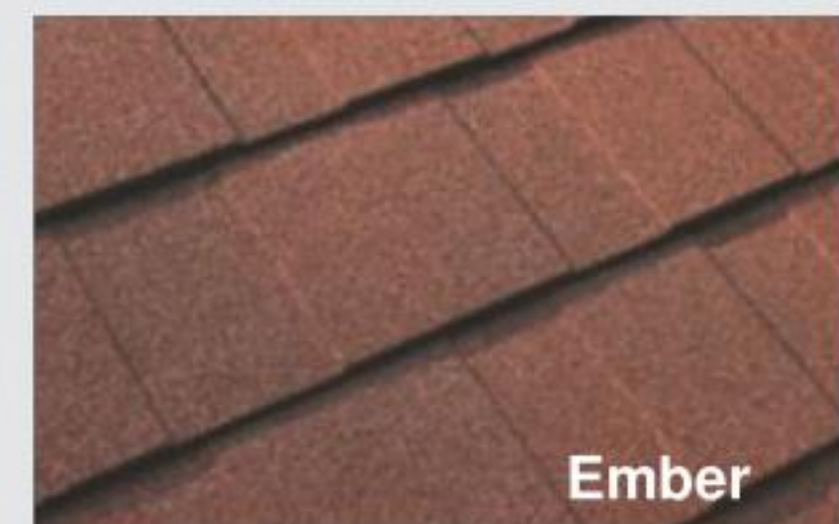

You will not find a more durable, versatile and attractive roofing product on the market that will surpass the ExtraLight quality and affordability.

TILE COLOURS

Charcoal

Ember
